PROJECTS

Farm360 | Smart Agriculture & Crop Disease Prediction | *React.js · Flask · XGBoost · CNN · Weather API*

GitHub: github.com/EElectriX/Farm360

- Developed a full-stack smart agriculture web application using React.js (Context API) and a Flask REST API backend
- Integrated ML (XGBoost) and Deep Learning (CNN) models for crop health and disease prediction
- Fetched real-time environmental data using a Weather API to enhance prediction accuracy
- Implemented multilingual support in the frontend using React Context API

Bapan Photography | Photography Portfolio Platform | *React.js · Vite · Tailwind CSS · React Router · Markdown*

GitHub: github.com/EElectriX/bapanphotography_version2 · Live: bapanphotography.in

- Built a responsive photography portfolio with React, Vite, and Tailwind CSS featuring gallery, journal, courses, and booking pages
- Developed dynamic gallery filtering, lightbox viewing, markdown-powered journal, testimonials, and scroll-based animations
- Implemented a booking form with API endpoint integration and reusable React components

Multi-User To-Do Application | Task Management App | *Django · PostgreSQL · SQLite · Render*

GitHub: github.com/EElectriX/multi_user_todo_list

- Built a multi-user full-stack to-do app with Django, HTML, CSS, and JavaScript with secure auth
- Designed a responsive UI and handled database migration from SQLite3 to PostgreSQL
- Deployed on Render with proper environment setup and production database integration
